

ISHIKA GAUR

QA / Test Engineer | web Developer Background

9058622316 | ishikalalitgaur521@gmail.com

github.com/Ishika-Gaur | linkedin.com/in/ishika-gaur-361115343

SUMMARY

BTech Computer Science student with hands-on frontend development experience, currently building foundational skills in QA/Testing. Practical exposure to bug identification and cross-browser/responsive validation while building and deploying 3 live production websites. Currently expanding knowledge of manual testing concepts, bug reporting, and Agile basics.

EDUCATION

BTech — Computer Science | Kothiwal Institute of Technology and Professional Studies (KITPS), Moradabad — Expected Graduation: 2027

EXPERIENCE

Frontend Developer Intern — Zentrix Infotech | 10 Sep 2025 – 10 Mar 2026 (6 Months)

- Manually tested and validated UI functionality, layout, and content across browsers and devices for 3 live production websites (jigyasahospital.com, karahomes.in, avs-enterprises.com) before deployment
- Identified and reported UI, responsiveness, and functional bugs during development, coordinating fixes prior to release
- Validated REST API data integration with PostgreSQL (Neon DB) backend for data accuracy and dynamic content correctness
- Performed cross-browser and responsive compatibility testing across desktop and mobile devices to ensure consistent UI/UX

PROJECTS

Jigyasa Superspeciality Hospital Website | jigyasahospital.com

- Responsive hospital website with dynamic content and PostgreSQL backend, used by real patients and staff (Next.js, Tailwind CSS, PostgreSQL, REST API)

Kara Homes — Brass Products Website | karahomes.in

- Built complete responsive frontend for a brass products e-commerce brand (Next.js, Tailwind CSS)

AVS Enterprises — Business Website | avs-enterprises.com

- Responsive business website built and deployed for AVS Enterprises (React.js, TypeScript, Tailwind CSS)

Personal Portfolio Website | ishikaprofile.netlify.app

- Animated personal portfolio with scroll effects, glass morphism UI, and dark theme (Next.js, TypeScript, Framer Motion, Tailwind CSS)

Premium Rice Export Company Website | rice-export-two.vercel.app

- Corporate website for an Indian rice export company targeting Dubai/UAE markets, with English/Arabic support and WhatsApp integration (React.js, Vite)

Podcast Platform Website | podcast-9pq8zcez7-ishika-gaurs-projects.vercel.app

- Built and deployed a podcast platform with a clean, responsive UI and episode listing pages (Next.js)

SKILLS

Testing & QA (Currently Developing): Manual Testing basics, Cross-Browser Testing, Bug Reporting, Agile Basics

Languages: HTML, CSS, JavaScript, TypeScript

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Tailwind CSS, Framer Motion

Database: PostgreSQL (Neon DB), MongoDB

Tools & Technologies: Git, GitHub, REST APIs, Vite, Vercel, Netlify, Responsive Web Design

CERTIFICATIONS — ZENTRIX INFOTECH

- Frontend Development Internship Completion | Cert: ZEN20260310HR31 | 10/03/2026
- Website Development — Jigyasa Hospital | Cert: ZEN20260308HR31 | 08/03/2026
- Kara Homes Frontend Project | Cert: ZEN20260212HR31 | 12/02/2026

VASTRA

Luxury Handcrafted Sarees — Full-Stack E-Commerce Platform

Live Project: <https://aurasaree.netlify.app/>

GitHub: github.com/Ishika-Gaur

Project Overview

VASTRA (deployed as VastraAura) is a full-stack luxury saree e-commerce platform built to bring the elegance of handcrafted Indian sarees online. The project covers the complete e-commerce lifecycle — product browsing, category/collection filtering, and an admin dashboard for managing the product catalog end-to-end.

Tech Stack

Layer	Technologies
Frontend	React, TypeScript, Tailwind CSS
Backend	Node.js, Express
Database	MongoDB Atlas
Hosting	Netlify (frontend)

Key Features

- Live product catalog powered by REST APIs, replacing earlier static product data
- Category, collection, and shop pages with dynamic filtering
- Dedicated admin panel with secure admin login
- Full admin product management — add, edit, and update products including images
- Local image upload system for product photos via custom upload middleware
- MongoDB-backed persistence with MongoDB Atlas

Engineering Challenges Solved

- Fixed a silent crash-and-fallback bug in the product data context that was masking real API errors
 - Resolved a broken /collections route affecting category navigation
 - Debugged a critical MongoDB _id immutability error that was silently blocking product edits
 - Fixed a useMemo dependency bug that caused shop, category, and collection pages to incorrectly show "0 Products Found"
 - Resolved TypeScript interface mismatches between frontend types and backend API responses
 - Refined field-priority logic in the product adapter layer for consistent product data display
-

Prepared as a project case study — VASTRA / VastraAura
