SUMMARY

BTech Computer Science student with hands-on frontend development experience, currently building foundational skills in QA/Testing. Practical exposure to bug identification and cross-browser/comprehensive validation while building and deploying 3 live production websites. Currently expanding knowledge of manual testing concepts, bug reporting, and Agile basics.

For: [redacted] [redacted] [redacted] (Thank You Prerna Foundation NGO Society) Date: 10/07/2026 Quotation No:

EDUCATION

Q-001

BTech — Computer Science | Kothiwal Institute of Technology and Professional Studies (KITPS), Moradabad — Expected Graduation: 2027

Project Overview

Frontend Developer Intern — Zentrix Infotech / 10 Sep 2025 – 10 Mar 2026 (6 Months)
Organisation: [redacted] (Thank You Prerna Foundation NGO Society), Mangupura, Moradabad
• Manually tested and validated UI functionality, layout, and content across browsers and devices for 3 live production websites (jigvasahospital.com, karahomes.in, avs-enterpri[redacted].com) before deployment
Client Contact: Abhishek
• Identified and reported UI, responsiveness, and functional bugs during development, coordinating fixes prior to release
Project Type: NGO Website
• Validated REST API data integration with PostgreSQL (Neon DB) backend for data accuracy and dynamic content correctness
Brief: A complete website for the NGO to show [redacted] its programs, accept donations, onboard volunteers, and share updates with the public.

PROJECTS

Jigyasa Superspeciality Hospital Website | jigvasahospital.com
• Responsive hospital website with dynamic content, no PostgreSQL backend, used by real patients and staff (Next.js, Tailwind CSS, PostgreSQL, REST API)
• 7 Pages: Home, About, Programs, Gallery, Get Involved, Blog, Contact
Kara Homes — Brass Products Website | karahomes.in
• • Built complete responsive frontend for brass products e-commerce brand (Next.js, Tailwind CSS)
• • Responsive design (mobile, tablet, desktop)
AVS Enterprises — Business Website with Bank Transfer & UPI details (QR code)
• • Responsive business website built and deployed for AVS Enterprises (React.js, TypeScript, Tailwind CSS)
• • Volunteer Sign-Up form
Personal Portfolio Website | ishikaprofile.netlify.app
• • Contact form with Google Map location
• • Animated personal portfolio with scroll effects, glass morphism UI, and dark theme (Next.js, TypeScript, Framer Motion, Tailwind CSS)
• • Social media icons (Facebook, Twitter, LinkedIn, YouTube, WhatsApp/Chat)
Premium Rice Export Company Website | rice-export-two.vercel.app
• • Basic SEO setup (titles, meta descriptions) by targeting Dubai/UAE markets, with English/Arabic support and WhatsApp integration (React.js, Vite)
Podcast Platform Website | podcast-9pq8zcez7-ishika-gaurs-projects.vercel.app
• Built and deployed a podcast platform with a clean, responsive UI and episode listing pages (Next.js)

QUOTATION / PROPOSAL

For: ██████████ ██████████ ████████ (Thank You Prerna Foundation NGO Society) Date: 10/07/2026 Quotation No: Q-001

Project Overview

VAISTRA (deployed as VastraAura) is a full-stack luxury saree e-commerce platform built to bring the elegance of handcrafted Indian sarees online. The project covers the complete e-commerce lifecycle: Product Catalog, Admin Dashboard, and Client Interaction. It includes a category/collection filtering system, and an admin dashboard for managing the product catalog end-to-end.

Brief: A complete website for the NGO to showcase its programs, accept donations, onboard volunteers, and share updates with the public.

Scope of Work	Layer	Technologies
• 7 Pages: Home, About, Programs, Gallery, Get Involved, Blog, Contact	Frontend	React, TypeScript, Tailwind CSS
• Responsive design (mobile, tablet, desktop)	Backend	Node.js, Express
• Donate Now section with Bank Transfer & UPI details (QR code)	Database	MongoDB Atlas
• Volunteer Sign-Up form	Frontend	React, TypeScript, Tailwind CSS
• Contact form with Google Map location	Backend	Node.js, Express
• Social media icons (Facebook, Twitter, LinkedIn, YouTube, WhatsApp/Chat)	Frontend	React, TypeScript, Tailwind CSS
• Basic SEO setup (titles, meta descriptions)	Frontend	React, TypeScript, Tailwind CSS

Pricing: Live product catalog powered by REST APIs, replacing earlier static product data
Category, collection, and shop pages with dynamic filtering

Item	Details	Amount (₹)
Website Design & Development	Full admin product management — add, edit, and update products including images Local image upload system for product photos via custom upload middleware 7 pages	8,000
Domain	MongoDB-backed persistence with MongoDB Atlas To be purchased by Client directly	Not included
Total Project Cost		₹8,000

Fixed a silent crash-and-fallback bug in the product data context that was masking real API errors
Resolved a broken /collections route affecting category navigation

- Payment Terms
- Advance (50%) to begin work: ₹4,000 — payable before development starts
 - Fixed a useMemo dependency bug that caused shop, category, and collection pages to incorrectly show "0 Products Found"
 - Remaining balance: ₹4,000 — payable before final handover
 - Payment mode: UPI / Bank Transfer
 - Resolved TypeScript interface mismatches between frontend types and backend API responses
 - Refined field-priority logic in the product adapter layer for consistent product data display

QUOTATION/PROPOSAL

EDUCATION: B.Tech Computer Science, Kothniwal Institute of Technology and Professional Studies (KITPS), Moradabad
Date: 10/07/2026 Quotation No: Q-001

EXPERIENCE OVERVIEW

Frontend Developer Intern — Zentrix Infotech (10 Sep 2025 – 10 Mar 2026 (6 Months))
Organisation: Zentrix Infotech (Thank You, Perna Foundation NGO Society), Mangupura, Moradabad
Manually tested and validated UI functionality, layout, and content across browsers and devices for live production websites.
Client Contact: Karahomes.in, avs-enterprises.com before deployment
● Identified and reported UI, responsiveness, and functional bugs during development, coordinating fixes prior to release
Project: NGO Website
Developed REST API integration with PostgreSQL (PostgreSQL) backend for data accuracy and dynamic content correctness
Brief: Reconnect web browser and responsive design with testing across desktop and mobile devices to ensure consistent UI/UX experience with the public.

Jigyasa Superspeciality Hospital Website | jigyasahospital.com

Scope of Work: Responsive web design, development, and deployment of a website for Jigyasa Superspeciality Hospital. The website will be built using HTML, CSS, JavaScript, and React.js, and will be hosted on a cloud platform. The website will include a home page, about page, services page, contact page, and a blog section. The website will be designed to be mobile-responsive and will include a search bar, a contact form, and a newsletter sign-up form. The website will be developed using a clean, modern design and will be deployed to a live environment. The website will be tested for functionality, performance, and security. The website will be launched and will be monitored for user feedback and analytics.
